Abstract of **JP 2000226324 (A)**

PROBLEM TO BE SOLVED: To obtain the subject composition, capable of easily cleaning and wiping regions, e.g. anal and private regions, preventing them from being inflamed by excretions or the like, keeping the skin clean, and safe, by including a specific plant extract solution, organic acid and water.

SOLUTION: This composition contains (A) a plant extract solution having a lipase inhibiting function (e.g. licorice extract), and/or a plant extract solution having a protease inhibiting function (e.g. aloe, soybean or barley extract), (B) an organic acid (e.g. fruit acid such as succinic acid, glutaric acid or adipic acid), and (C) water (normally refined water). The preferable contents of these components are, the component A: 0.001 to 2.0 wt.%, more preferably 0.001 to 1.0 wt.%, component B: 0.001 to 5.0 wt.%, and component C: 10 to 98 wt.% (50 to 98 wt.% in the case of cosmetic water).
